Subject: Summer Training for Engineering Students

Dear Sir / Madam,

1. Maharaja Surajmal Institute of Technology was established by Surajmal Memorial Educational Society in 1982 to provide quality education in the field of, Engineering & Technology. It is a non-profit institution with a focus on developing human potential. The institute is ideally located in Institutional area of Janak Puri. The campus is spread over 8 acres of land with lush green lawns, trees and magnificent buildings. Institute has excellent infrastructure and possesses all the facilities, which a good technical institute should possess. The Institute was affiliated to G.G.S.I.P. University in 2001 to impart degree level education in Engineering.
2. The Institute offers degree courses in four disciplines, each of four years duration i.e. Electronics & Communication Engineering (ECE), Computer Science Engineering (CSE), Information Technology (IT) and Electrical & Electronics Engineering (EEE). There is strong focus on the academic excellence throughout the course through regular tests, tutorials and guest lectures. At the same time the personality development of students is also an area of emphasis. Numerous workshops, group discussions and seminars are a part of the ongoing activities throughout each semester. The current batch of our senior most students will be graduating in June 2016 and we have high expectations from them for the future. A large number of students are already placed with many companies of repute through the organized campus activity (Microsoft, Infosys, Impetus, Libsys, NEC, Markit, Newgen, Hitachi, Vinsol and CSC). Some students are in the process of getting admission in highly reputed institutes like IISc/IIMs/IITs for post graduate courses, while others are likely to pursue MS degree courses in universities abroad. Previous batches have excellent placements in the companies mentioned above as well as in Cadence, Synopsis, Ericsson, IDEA Cellular, Intel, Nokia Siemens Network, Cognizant, Toshiba, ISRO, Free scale, Samsung, Deloitte, Alstom, Google India, TCS, Accenture, HCL and many more companies of repute. This institute has produced university Gold Medalists each year right from the stage of inception.
3. The students who are presently studying in the fourth and sixth semester are required to undergo practical industrial training as a part of the curriculum. At the end of their training, the students are required to submit detailed report and also undergo oral examination. As the assessment for practical training is included in final examination results, the desired seriousness is assured on the part of our trainees.
4. With a view to enhance the practical knowledge of our engineering students, it is requested that they be allowed to be trained at your industry for a period of 6 to 8 weeks or more. An early reply will help us plan our summer training better. We would particularly like to request for the following student to be accommodated by your organization:

NAME DEVANSH DABAS ROLL NO 31515004914 B.TECH (EEE)
Semester IVth

Looking forward to a positive response from you.

With warm regards,
